NO.	ACTIVITY	ACTION BY
1.0	<u>Opening</u> The family meeting was held on 29th August 2025 at Adenta Kpabikpabi Labu, in the residence of Miss Doris Annor.	
2.0	<u>AGENDA OF THE DAY</u> 1. Discussion of registering Dodowa Akwateng land which has been on the table for close to two years now. 2. Meeting two Personnel from; i. Land and Valuation Department ii. Madam Little (Registrar Department) The family raised questions regarding how certain individuals were able to register portions of the land and how that process has been of benefit. The response to our question was that we need to write to the Land Title Department, as well as the Valuation and Surveyor's Department, to ensure that no title is issued without our consent. Currently, Madam Loven Pinto's name is being used, and the Title Office has not exercised due diligence in the matter.	

	Finally, we need to speed up registering the entitled land. The previous registration covered 113 acres on the Indenture, while the sale plan indicated 187 acres. The current barcoding reflects 215 acres; however, the land that has been registered so far is approximately 22 to 25 acres. The amount required to register the remaining acres of land is Ten Thousand Ghana Cedis (GH¢10,000), which covers publishing, title processing, and valuation (an action already initiated by Andrews and Victor Pinto). The family agreed to disburse the said amount into four (4) parts, with each clan contributing GH¢25,000 over five months. This requires each clan to raise GH¢5,000, beginning 1st September 2025. However, based on this agreement, only two clans were able to pay their GH¢5,000 contribution for the month. Instead of the expected GH¢20,000, only GH¢10,000 was raised. A suggestion was therefore made that two plots of land be sold to cover the outstanding GH¢20,000, which the family accepted. Additionally, two groups within the family have identified potential supporters who are willing to contribute GH¢20,000 over a five-month period. Once the family reaches a final agreement, a date will be fixed to meet with them. Finally, the family’s financial accountability report will be shared on the official family platform.	
3.0	3. Finally, we need to expedite the process of registering the entitled land. The previous registration covered 113 acres on the Indenture, while the sale plan indicated 187 acres. The current barcoding reflects 215 acres; however, the land that has actually been registered so far is approximately 22 to 25 acres.	
4.0	<u>CLOSING</u> The meeting ended at 12:30am Closing prayers was said by Andrews Pinto.
